## DEMOGRAPHIC STUDY

FOR THE
SOUTH HUNTERDON
REGIONAL SCHOOL DISTRICT

March 22, 2021

## STATISTICAL FORECASTING

- Provide demographic services for school districts in the New York-New Jersey metropolitan area since 1998.
- Performed demographic studies for approximately 175 school districts in NY \& NJ.
- Demographic consultant for the NYC Public Schools since 2006.

## RICHARD S. GRIP ED.D.

- Executive Director
- Doctorate from Rutgers University Graduate School of Education in Educational Statistics and Measurement
- Numerous publications on school demography and presentations nationally
- Testified as an expert witness in school demography in several Administrative Law court hearings.

## PURPOSE OF THE STUDY

$\square$ Project grade-by-grade enrollments from 2021-22 through 2025-26, a 5-year period
$\square$ Analyze community population trends and age structure, birth, and fertility rates
$\square$ Examine historical enrollment trends, both districtwide and by grade configuration (PK-6 and 712)

Compare current and projected enrollments to building capacities
$\square$ Research new housing starts and the impact on school district
$\square$ Project enrollments based on students yields and housing turnover rates (completely independent analysis)

## HISTORICAL AND PROJECTED POPULATIONS 1940-2040

## COMMUNITY DEMOGRAPHIC PROFILES

- Aggregated population of 3 communities - 7,052. Lambertville has the greatest population $(3,801)$, accounting for $54 \%$ of total.
- Majority race is White in each town. Hispanics are the secondlargest race in Lambertville and Stockton, Asians are the secondlargest race in West Amwell.
- West Amwell has the lowest median age (47.0 years) while Stockton has the highest ( 54.9 years), all are much higher than that NJ (40.2 years).
- The foreign-born percentage is low and ranges from 5.4\%-9.5\%.
- The percentage of persons with a bachelor's degree or higher is fairly similar, ranging from $47.4 \%-51.6 \%$.
- West Amwell has the highest median family income $(\$ 130,688)$ and median value of an owner-occupied unit $(\$ 462,800)$.
- West Amwell has the highest percentage (95.4\%) of one-unit homes, either detached or attached. Lambertville has the lowest (61.9\%).
- Lambertville has the highest percentage (47.6\%) of renteroccupied units. West Amwell has the lowest (11.5\%).

## SCHOOL LOCATIONS

## HISTORICAL ENROLLMENT TRENDS

District's 2020-21 enrollment $(10 / 15 / 20)$ is 861.5 .
Enrollment has been generally declining over last five years.
$\square$ 2011-12 enrollment $=860.5$ ( 4 districts combined before regional was formed in 2014-15).
$\square$ Loss of 59.5 students in past year, partially due to COVID.
$\square$ Cohort-Survival Ratio Method (CSR) was used to project enrollments five years into the future.

HISTORICAL ENROLLMENTS (PK-12) 2011-12 TO 2020-21

## HISTORICAL ENROLLMENTS BY GRADE CONFIGURATION 2011-12 TO 2020-21

## ENROLLMENT PROJECTION METHOD COHORT SURVIVAL RATIO

$\square$ Ratios are calculated for each grade progression. (Ex. $1001^{\text {st }}$ graders in 2019-20 become $952^{\text {nd }}$ graders in 2020-21 $=0.95$ )
$\square$ Ratios above 1.000 = inward migration, below 1.000 = outward migration
$\square$ Survival ratios were computed for ten historical years.
$\square 8$ of 13 average ratios were below 1.000 indicating slight net outward migration.
$\square 4$ ratios in 2020-21 were lowest in last decade, likely due to COVID.
$\square$ Averages were then computed and used to project future enrollments.

## KINDERGARTEN REPLACEMENT

$\square$ Negative kindergarten replacement (KR) in 4 of last 5 years, ranging from 18.5-25.5 students per year.
$\square$ Positive KR four years prior, ranging from 4.5-17.5 students per year.
$\square$ Negative KR- Number of kindergarten students entering district is less than graduating $12^{\text {th }}$ grade students from prior year.
$\square$ Negative KR in district is result of smaller kindergarten cohorts entering the district.

## HISTORICAL KINDERGARTEN REPLACEMENT

## TOTAL ENROLLMENT CHANGE VS. KINDERGARTEN REPLACEMENT

## BIRTH COUNTS

$\square$ Births are used to project kindergarten students 5 years later.
$\square$ Analyzed birth data from 2006-2019. Aggregated births declined from high of 94 in 2006 to 48 in 2017.
$\square$ As a result, kindergarten declined from 80 in 2011-12 to 48 in 2020-21.

## BIRTH COUNTS AND BIRTH-TO-KINDERGARTEN SURVIVAL RATIOS

| Birth Year | Lambertville <br> Births | Stockton <br> Births | West Amwell <br> Births | Total <br> Number <br> of Births | Kindergarten <br> Students Five <br> Years Later | Birth-to- <br> Kindergarten <br> Survival Ratio |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2006 | 57 | 9 | 28 | 94 | 80 | 0.851 |
| 2007 | 50 | 5 | 26 | 81 | 58 | 0.716 |
| 2008 | 45 | 10 | 24 | 79 | 64 | 0.810 |

## NEW HOUSING

- Municipal representatives contacted in each community.
- Lambertville- 16-17 non age-restricted housing units, most of which are townhouse units.
-Stockton and West Amwell - there are no residential developments under construction, nor are there applications for residential subdivisions before the respective planning boards.
- In total, seven (7) public school children (K-12) are projected to be generated from the new housing developments in Lambertville.

## STUDENT WITHDRAWALS 2020-21

| School | Grade |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 5-year Change | -17 | -14 | -63.5 | -47.5 |

## CAPACITY ANALYSIS

| Grade Configuration | Capacity | Current <br> Enrollment <br> 2020-21 | Difference | Projected <br> Enrollment <br> $2025-26$ | Difference |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Elementary <br> (PK-6) | 575 | 432 | +143 | 418 | +157 |
| South Hunterdon <br> Regional H.S. <br> (7-12) | 434 | 429.5 | +4.5 | 382 | +52 |

## HOUSING TURNOVER ANALYSIS

Completely independent analysis using houses, not students, to project enrollment. Completed for 1-4 family homes.

Should not be used for yearly enrollment projections. Use those from CSR.

Three inputs:

1. Housing turnover rates by length of ownership
2. Current distribution of homes by length of ownership
3. Student yields by length of ownership

## TURNOVER RATES

- Used parcel-level data to track each home through its "lifecycle". Data contained sale dates, sale prices, and year home was built.
- Sales data were collected from 1990-2019.
- Follow each year's cohort of homes beginning in 1990 to see when they sell.
- Ex. Home built in 1980 sold in 2002, 2008, and 2012 (part of three cohorts). First length of ownership is 6 years, second length of ownership is 4 years, current length of ownership is 7 years.

## WEIGHTED-AVERAGE TURNOVER RATES BY LENGTH OF OWNERSHIP

## CURRENT NUMBER OF HOMES BY LENGTH OF OWNERSHIP

## STUDENT YIELDS BY LENGTH OF OWNERSHIP

## HOUSING TURNOVER PROJECTION METHODOLOGY

- Use current length of home ownership distribution and historical turnover rates to either a) advance homes to next year of ownership or b) sell home and have it return to zero years of ownership.
- Number of homes at each length of ownership is multiplied by student yield at each length of ownership.

## SCENARIO 1

|  | 2020 | 2021 | 2022 | 2023 | 2024 |
| ---: | :---: | :---: | :---: | :---: | :---: |
| Students from <br> One- to Four-Family Homes | 719 | 721 | 729 | 730 | 716 |
| Students from mixed-use <br> units, apartments, out of <br> town, no address or <br> unmatched (constant) | 280 | 280 | 280 | 280 | 280 |
| Total | $\mathbf{9 9 9}$ | $\mathbf{1 , 0 0 1}$ | $\mathbf{1 , 0 0 9}$ | $\mathbf{1 , 0 1 0}$ | $\mathbf{9 9 6}$ |

## SCENARIO 2

|  | 2020 | 2021 | 2022 | 2023 | 2024 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Students from <br> One- to Four-Family Homes | 711 | 709 | 713 | 704 | 682 |
| Students from mixed-use <br> units, apartments, out of <br> town, no address, or <br> unmatched (constant) | 280 | 280 | 280 | 280 | 280 |
| Total | $\mathbf{9 9 1}$ | $\mathbf{9 8 9}$ | $\mathbf{9 9 3}$ | $\mathbf{9 8 4}$ | $\mathbf{9 6 2}$ |

## COVID-19

- Effects of COVID-19 on enrollment are varied across the country.
- Vermont has $2-5 \%$ increase this year after years of enrollment decline (15\% increase in some towns).
- Big declines in large school districts- Los Angeles (-11,000), Broward County ( $-8,500$ ), Orange County $(-8,000)$, Charlotte-Mecklenburg (5,000).
- People are leaving large metro areas to live in rural COVID-free areas, either in 2 nd homes or a purchased home. Will they return?
- Student withdrawals - highly concentrated in lower elementary grades (NJ district: 40 of 124 withdrawals were kindergarten). Kindergarten redshirting?
- Most student withdrawals are students going to private school or being homeschooled. Rate of withdrawal seems to be linked to whether district is $\mathbf{1 0 0 \%}$ virtual learning, hybrid, or full in-person instruction.
- 2 working parents likely to place child in a private school. Will they return back to public school?

## SUMMARY

- Enrollments are projected to decline in the next five years, mostly in the middle/high school.

1. Declining birth rate
2. Net outward migration of students

- Smaller kindergarten cohorts from declining births result in smaller elementary, middle, and, eventually, high school grades as they move through the system.
